Subject: From Rt Hon Jeremy Hunt MP to Stuart Jarvis, HCC - Objection to Veolia Incinerator

Importance: High

Dear Mr Jarvis

I am writing to add my voice to the very strong objections against the proposed application by Veolia for an incinerator on the A31, Froyle.

Having considered the proposed application, I would like to raise my serious concerns regarding the following:

- The scale of the building is completely out of keeping with its immediate environment being a countryside setting close to the National Park. I believe it is being located in the wrong place most particularly in light of the fact that it is going to be utilised for **commercial waste**.
- The probable impact of the noise, odour, atmospheric emissions, light pollution and increased HGV movements which are all likely to impact on SW Surrey and my constituents. Many have already written to me raising their significant concerns about the associated increase in traffic flow and HGVs through our already congested towns and villages – which would cause huge problems.
- Given the environmental impact this will have on the local area I completely oppose it. The air pollution and additional traffic pollution will adversely impact all the areas close to the incinerator, including SW Surrey, and even more so given that the facility is intended to operate 24 hours a day, seven days a week, over a period of approximately 30 years.

I understand that local councillors and also my Parliamentary colleague, Damian Hinds MP, are also very much against the proposals.

I would be grateful if you would take into due consideration my very strong feelings about this application and pass on my email to all members of the Planning Committee concerned in this decision, and please keep me updated on any new developments regarding this proposal.

I have also copied Ms Katie Stewart, Executive Director for Environment Transport and Infrastructure, Surrey County Council into this email as I have written to her previously regarding this matter.

Best wishes

Jeremy Hunt
